Supplementary Figure 1. Comparison between parental and resistant cells. (A) Cell morphology between parental cells ACHN, 786-O and resistant cells ACHN-R, 786-O-R. (B) Wound healing assays of resistant and parental cells with/without sunitinib treatment. Each experiment was performed at least three times and data was represented as mean ± SEM. *P<0.05, **P<0.01 and ***P<0.001.
Supplementary Figure 2. **SAA1 is overexpressed in clinical samples.** Each experiment was performed at least three times and data was represented as mean ± SEM. *P<0.05, **P<0.01, ***P<0.001 and ****P<0.0001.

Supplementary Figure 3. **JAK-STAT3 signaling pathway is activated in clinical samples.** Each experiment was performed at least three times.
Supplementary Figure 4. Lower expression of SAA1 after TFAP2A knockdown. Each experiment was performed at least three times and data was represented as mean ± SEM. *P<0.05, **P<0.01, ***P<0.001.
